EDITOR'S NOTES

These notes are opened with an acknowledgment and appreciation of the work performed by my predecessor, "Pop" Dyson. Rewards are so often unseen and unheard. This is also true of the executive officers of the Association and its sub-sections, who shun publicity. Result of their efforts will be published for all to read.

The stimulation of constructive criticism is particularly useful, so please write in, let us have your views and if they are controversial, all the better. The strength and force of our Association is now being consolidated. So let us have your letters. It is hoped to include in subsequent issues extracts from letters on controversial subjects. These will be circulated far and wide, and obtain as a result the considered opinions of all wherever they may be.

I ask also for general news, and articles of topical interest. News published in these pages constitute a permanent record to be read again in years to come with memories refreshed. "Nice, or Nasty," let me have it!
